

Digital Transformation Portal Enabler for Shipping

The things which were once difficult and time-consuming are now simplified and made efficient. In fact, digital transformation is the transformation of the business and organizational activities with the present and future shifts in mind. i.e. transferring your company from manual processes into a fully digital and automated workplace.

Digital transformation is not possible without employee empowerment. Intranet lets you communicate with people and thereby keep them informed, it enables to engage employees and foster open conversation. SharePoint communication site helps you to reach a broad level of the audience. A communication site is a dynamic and beautiful site that lets you reach many onlookers thereby keeping the organization employed and informed. It empowers every individual or an organization to share confidently, transform business process, engage the employees and users and harness collective knowledge.

Portal Components

A well designed Digital Workplace is the core of organization's inside-out digital transformation process.

Carousel

Share your company-wide news, events and announcements on the homepage. **Carousel** allows multiple pieces of content to be displayed in the same place (once at time).

Calendar

The **Calendar** component displays all important Company events and important dates that everybody should be aware of.

People Directory

An intranet should help you get in touch with your colleagues, and **People Directory** helps you find people within different departments fast and easy and view the required contact details.

Tasks

The **Tasks** component offers a personalized, comprehensive view of all pending tasks. Users can easily approve/reject a task or they can navigate to the application referenced in the pending task and complete the task.

Quick Links

The **Quick Links** component displays a collection of Document Libraries and Workflows (e.g. Leave Request, Expenses Claim Request). Quick Links provide fast and easy access to important document libraries and workflows.

Who is on Leave

The **Who is on Leave** component displays who is currently on leave and who will be on leave in the upcoming days.

Fleets / Vessel Information

Fleets / Vessel Information is easily accessible by your employees (e.g. vessel name, fleet name, types, crew members, next maintenance, image).

FAQ

FAQ are listed questions frequently asked by users. The purpose of this component is to make finding answers easy for users.

Vessel Location

Vessels Locations are displayed on a map. The Portal allows employees to easily find the location of a vessel.
