

Information Security Policy Statement

Ref. ISEC013

The Policy of Logicom Solutions Ltd and its Business Consulting and Infrastructure Solutions and Services Divisions is the provision of specialized solutions and services to support the design and execution of the Business and IT Strategy of organizations.

This is achieved through a team of highly skilled and qualified consultants in a manner that information security standards are ensured. Based on this, our company can maintain its competitiveness and safeguard sensitive information in providing IT advisory services, analytics services, information security and IT risk services, infrastructure architecture design services, collaboration and networking solutions and services, security infrastructure solutions and services, data centre design and implementation services, cloud and IoT solutions, to customers in Cyprus and abroad.

Information Security in this context is considered to be of the highest importance and is maintained at all times by establishing and applying strong controls and measures through a framework of policies and procedures as part of a robust Information Security Management System. The management of Logicom Solutions Ltd is therefore committed to providing high quality services, as per customer requirements, while at the same time abiding to the relevant national laws, regulations and information security best practices and standards.

Logicom Solutions Ltd has adopted and implemented an Information Security Management System compliant with the requirements of the ISO27001 for the structuring, maintenance and continuous improvement of policies, procedures and controls to safeguard the confidentiality, integrity and availability of information and the relevant processing facilities.

Through the information security management system, the management continuously sets information security objectives and targets and assesses the performance of the company through relevant information security performance indicators. The Management reviews and revises its objectives and targets on a systematic basis, during management reviews, with the aim of continuous improvement of the information security management system, its policies and procedures but also the corporate performance of the company.

Our strengths are our highly qualified and experienced personnel, our long standing and established relationship with world-renowned partners and vendors, and our strong brand name and reputation in our customers and the market in general.

A handwritten signature in blue ink, appearing to read "Chrysostomos Kridiotis".

Chrysostomos Kridiotis
