

Logicom Solutions & Cisco Outmaneuvering malware

Logicom
Solutions

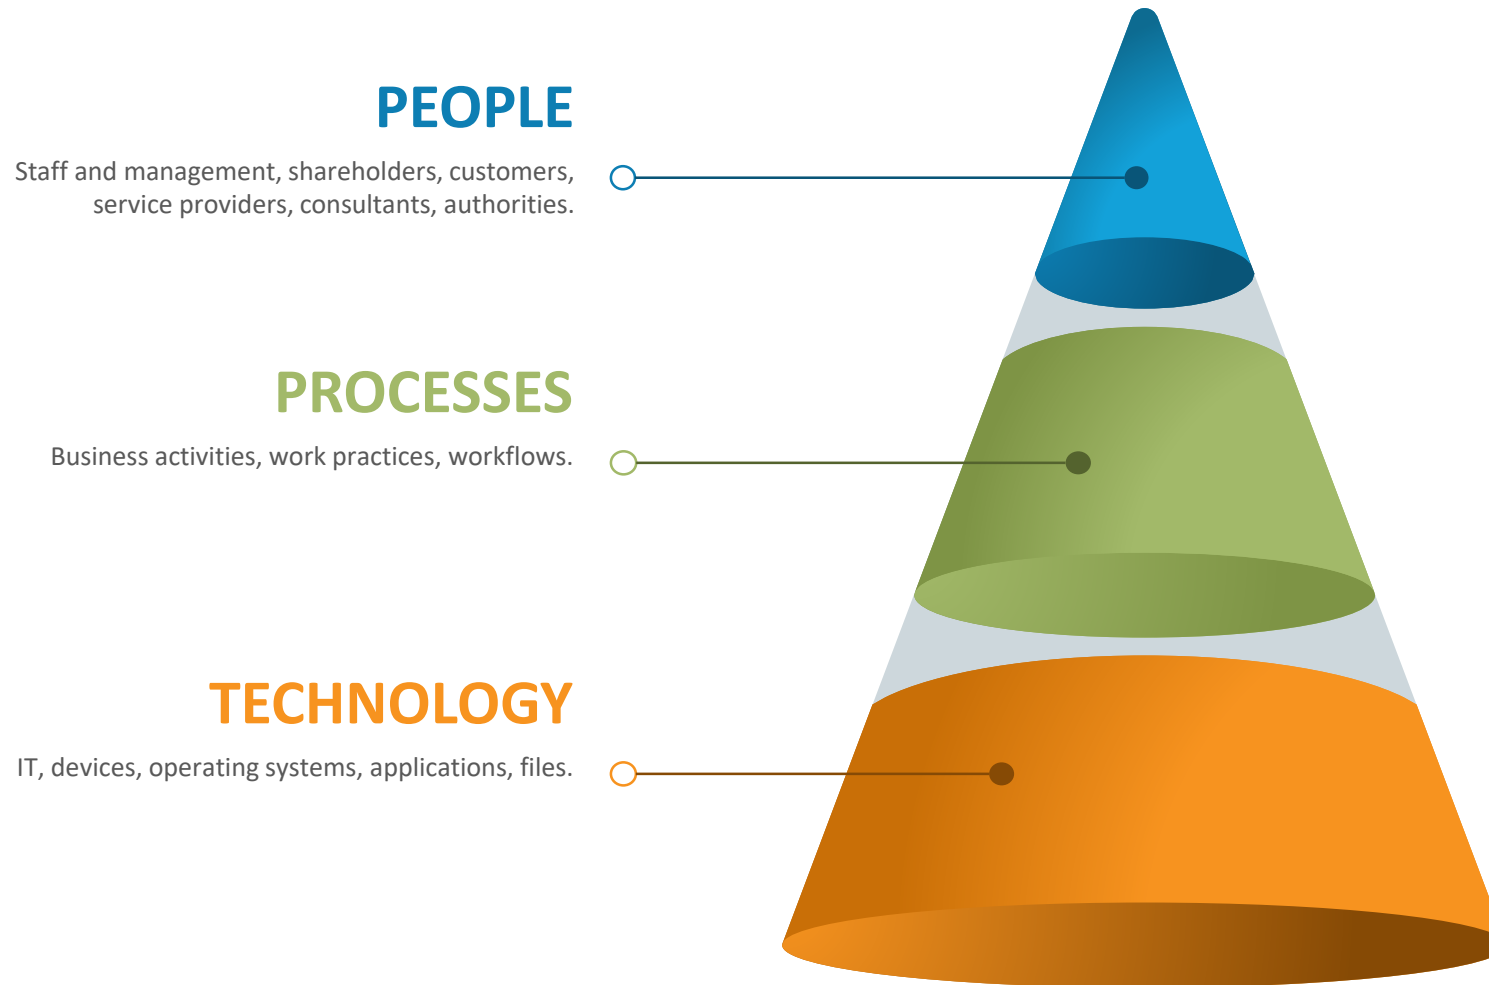

Harrys Tsiartas

CTO

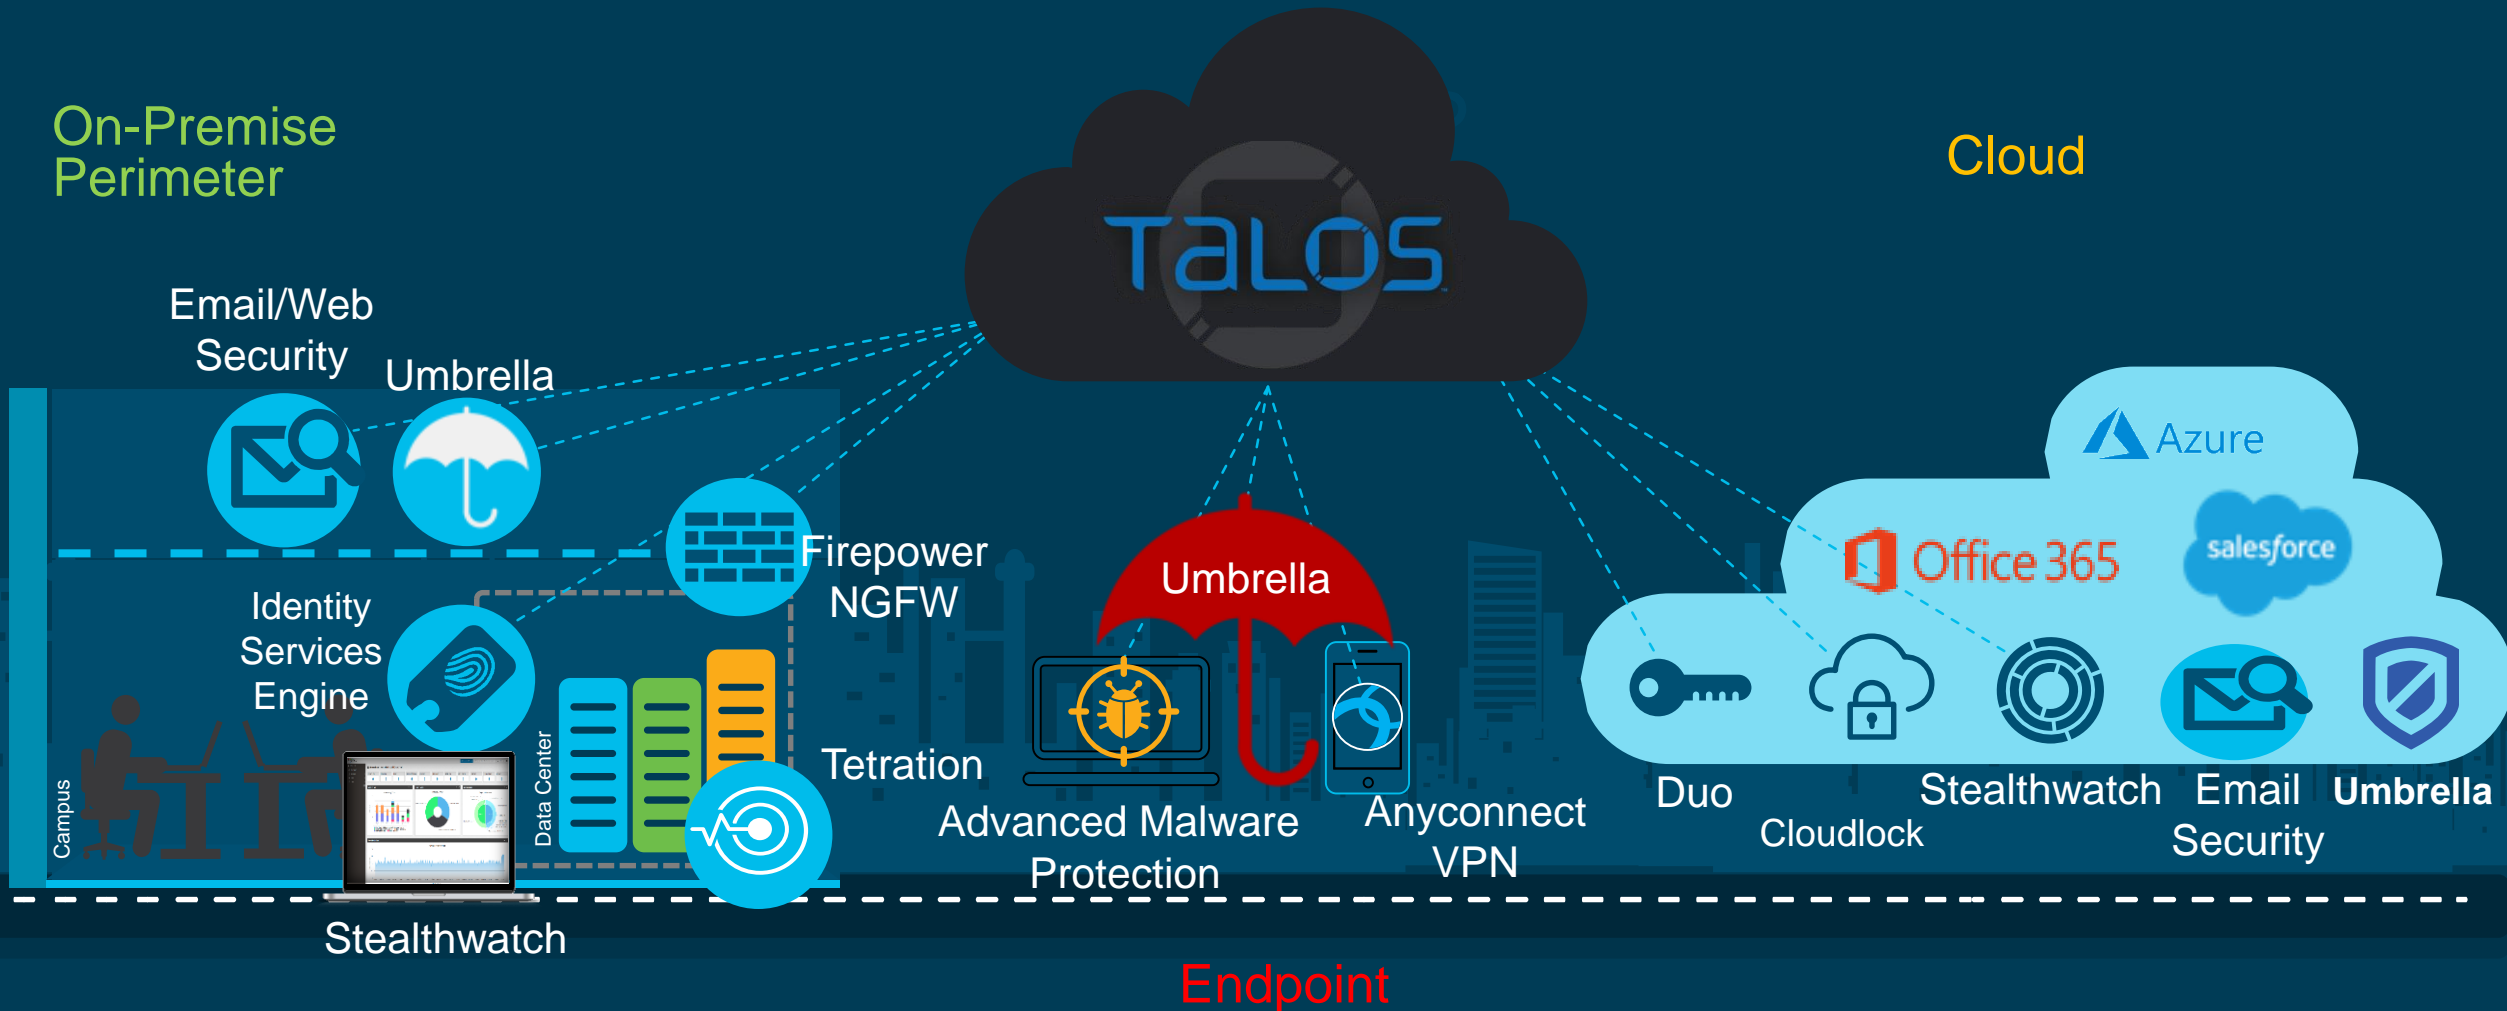

Logicom Solutions

Holistic security approach

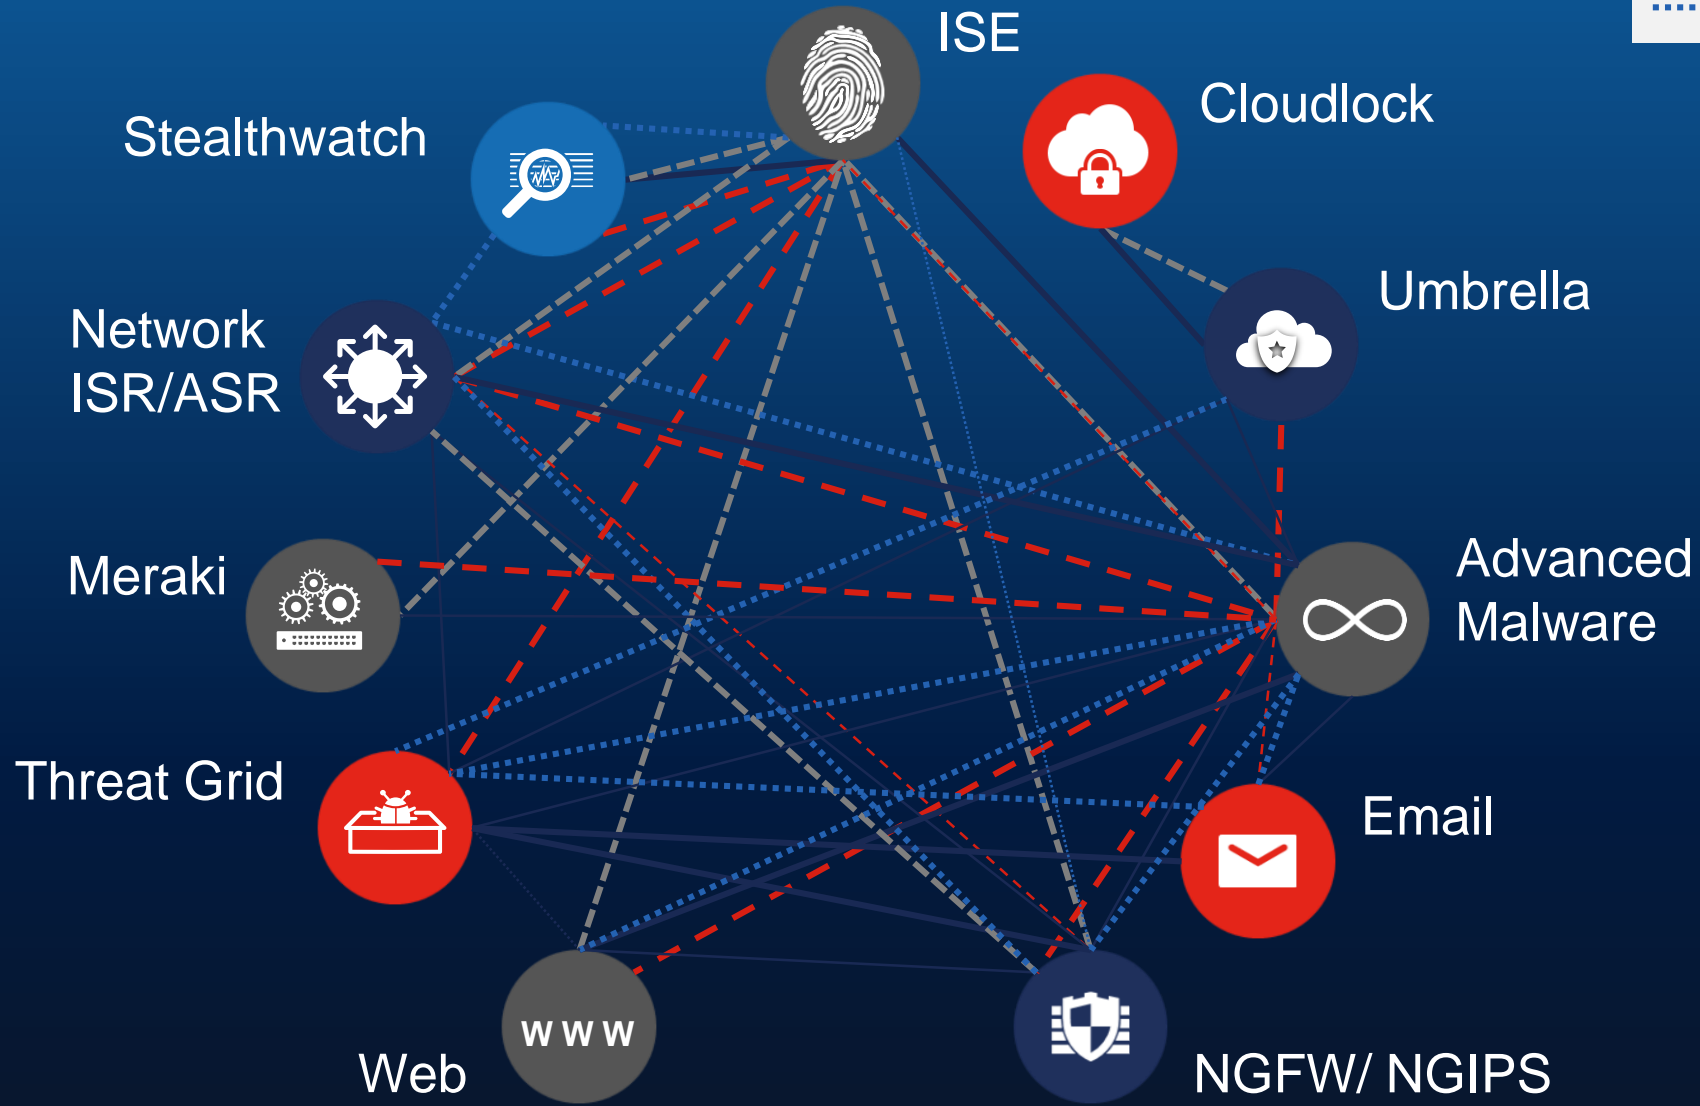

- Security elements

Cisco Security: Network, Endpoint & Cloud

Solution Integration: Cisco Portfolio

Standards regulations to watch for 2019

GDPR

Privacy by design by default, state of the ART,

TLS 1.3

MITM not possible anymore, Privacy wins!, Whats next?

WPA3

More secure, but will take a bit longer for adoption

802.1AE aka MACsec, adopt now!

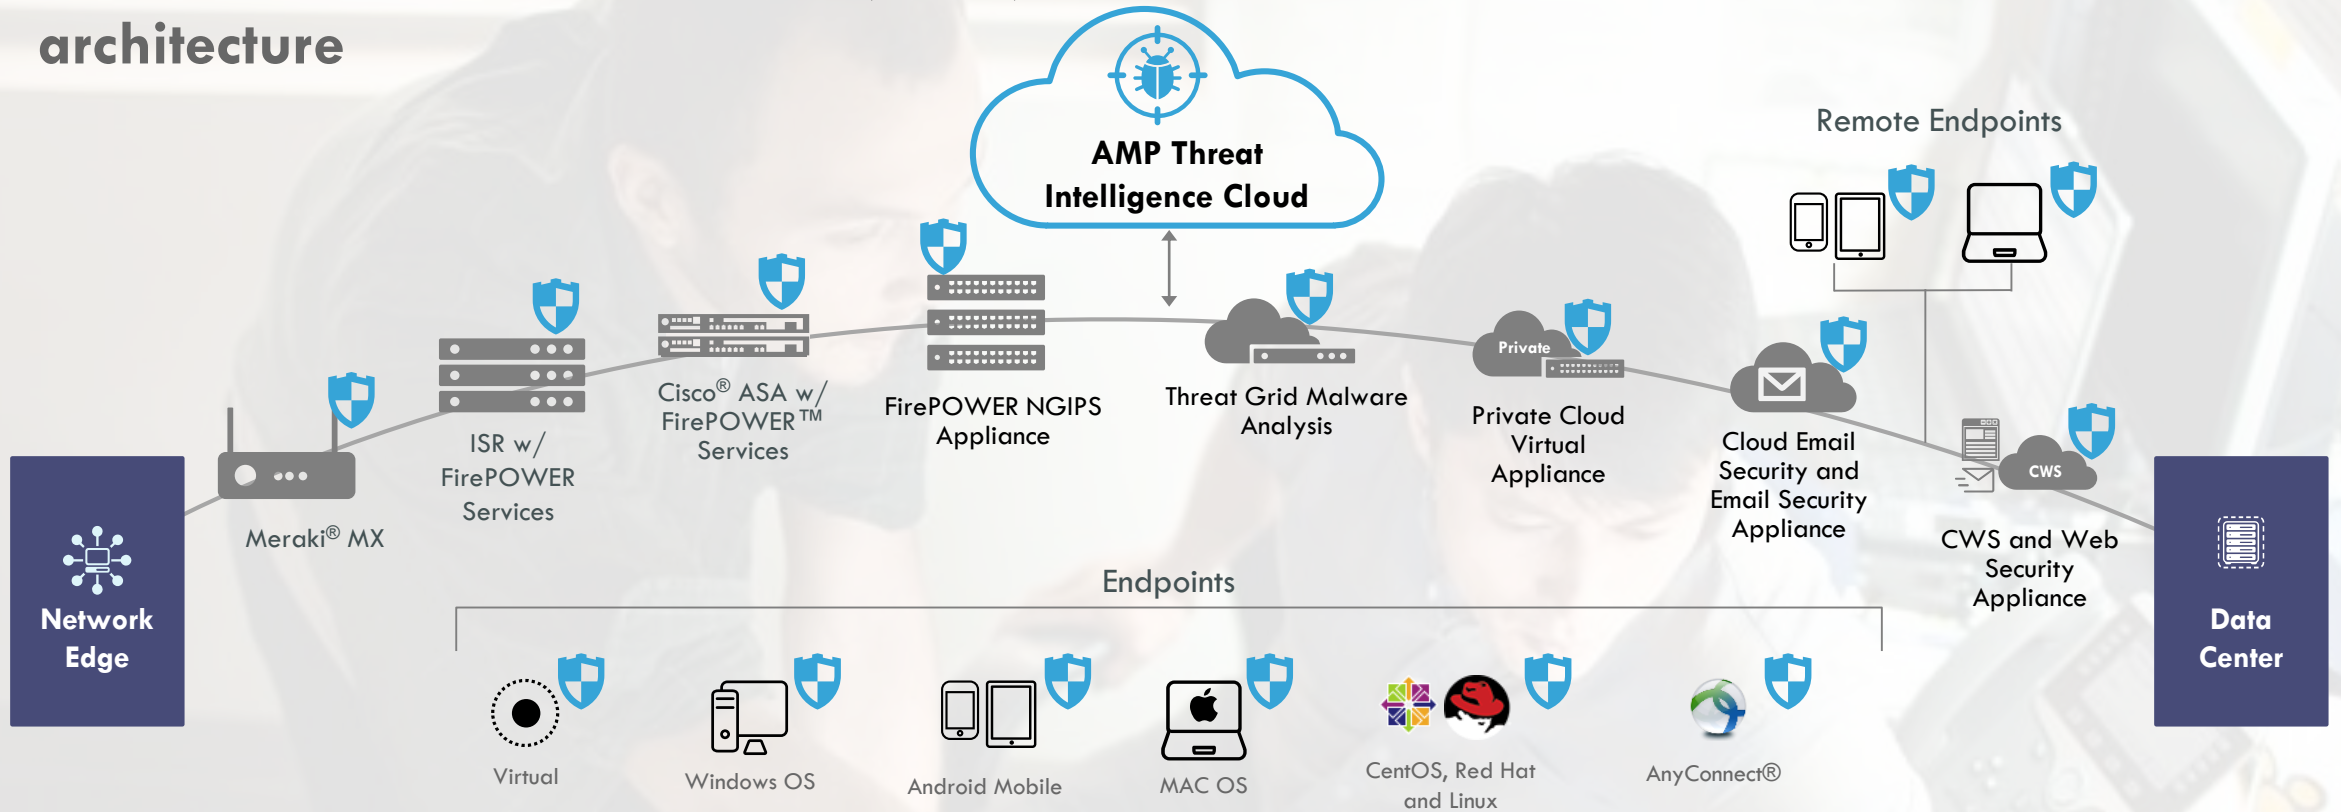

Top Ten List on Ransomware protection

1. Backup
2. Patch
3. Educate users on attack methods
4. Protect your network
5. Segment network access
6. Keep a close eye on the network activity
7. Prevent infiltrations
8. Arm your endpoints
9. Gain real-time threat intelligence
10. Don't pay the ransom

Detect and contain advanced threats quickly

Advanced Malware Protection (AMP) architecture

Leverage threat intelligence
and dynamic malware analysis

Deploy easily with
multiple platform options

Thank
you!
