RECENT PASSWORD BREACHES

THE TOPICS WE WILL DISCUSS TODAY

- WHY YOU SHALL NOT PASS
- SHOULDER SURFING - REENGINEERED
- DATA AND PASSWORD LEAKAGES
- HOW CAN SOMEONE OBTAIN ACCESS TO THESE LEAKS
- DARK INTERNET JOURNEY
- ANALYSIS OF COLLECTION #1

WHY… "YOU SHALL NOT PASS"

SOME OF THE REASONS WHY YOU SHALL NOT PASS

PASSWORD

"A secret word or phrase that must be used to gain admission to a place."

- Password reuse phenomenon
- Same password for a long time
- Use of too weak passwords.
- Stolen through social engineering
- Password-cracking tools
- Password leaks

- Shared passwords amongst users
- Passwords written in sticky notes
- Stolen passwords via malware
- No proper management of accounts
- Many users have default password.
- Sent over unsecure networks

RECENT PASSWORD BREACHES

The next slides list **some** of the incidents that have been **discovered** and **reported** during the **last month**.

IS NOT A LIST OF INCIDENTS OF ONE MONTH

ARE **SOME OF THE INCIDENTS** DISCOVERED **LAST MONTH**…

Haga Ziekenhuis

SEP 2019

A Dutch hospital has been fined €460,000 after staff used sheets of paper containing medical information as a shopping list – and then left them in a shopping trolley. **The breached information includes patients' names, treating physician, reason for admission, medication was provided**, etc.

Health records are highly valued in the cyber crime industry, because they contain detailed information that can be used for identity theft, fraud, or spear phishing.

Malindo air

SEP 2019

Details of around **30 million passengers** of Malindo Air (a Malaysia airline company) were posted in online forums. The leaked information included passengers' passport details, addresses and phone numbers.

The files were uploaded and stored in an open Amazon Web Services (AWS) bucket, a public cloud storage resource.

IS NOT A LIST OF INCIDENTS OF ONE MONTH

ARE **SOME OF THE INCIDENTS** DISCOVERED **LAST MONTH…**

SEP 2019

More than **419 million records** of phone numbers linked to Facebook accounts have been found online. Some of the records also had the user's name, gender and location by country.

The exposed server wasn't protected with a password, thus anyone could find and access the database.

SEP 2019

The personal records of most of Ecuador's population, including children, has been left exposed online due to a misconfigured database. The Elasticsearch server contained a total of approximately 20.8 million user records, a number larger than the country's total population count (16.6 million citizens).

The leak was including details such as names, family trees, civil registration data, financial and work information, car ownership.

IS NOT A LIST OF INCIDENTS OF ONE MONTH

ARE **SOME OF THE INCIDENTS** DISCOVERED **LAST MONTH…**

SEP 2019

Tens of millions of images of cars entering or exiting Tesco Car Parks, were freely available to anyone who could correctly deduce the format of the required HTTP POST request.

It was said that during a planned data migration exercise to an AWS data lake, access to the Azure blob was opened to aid with the process.

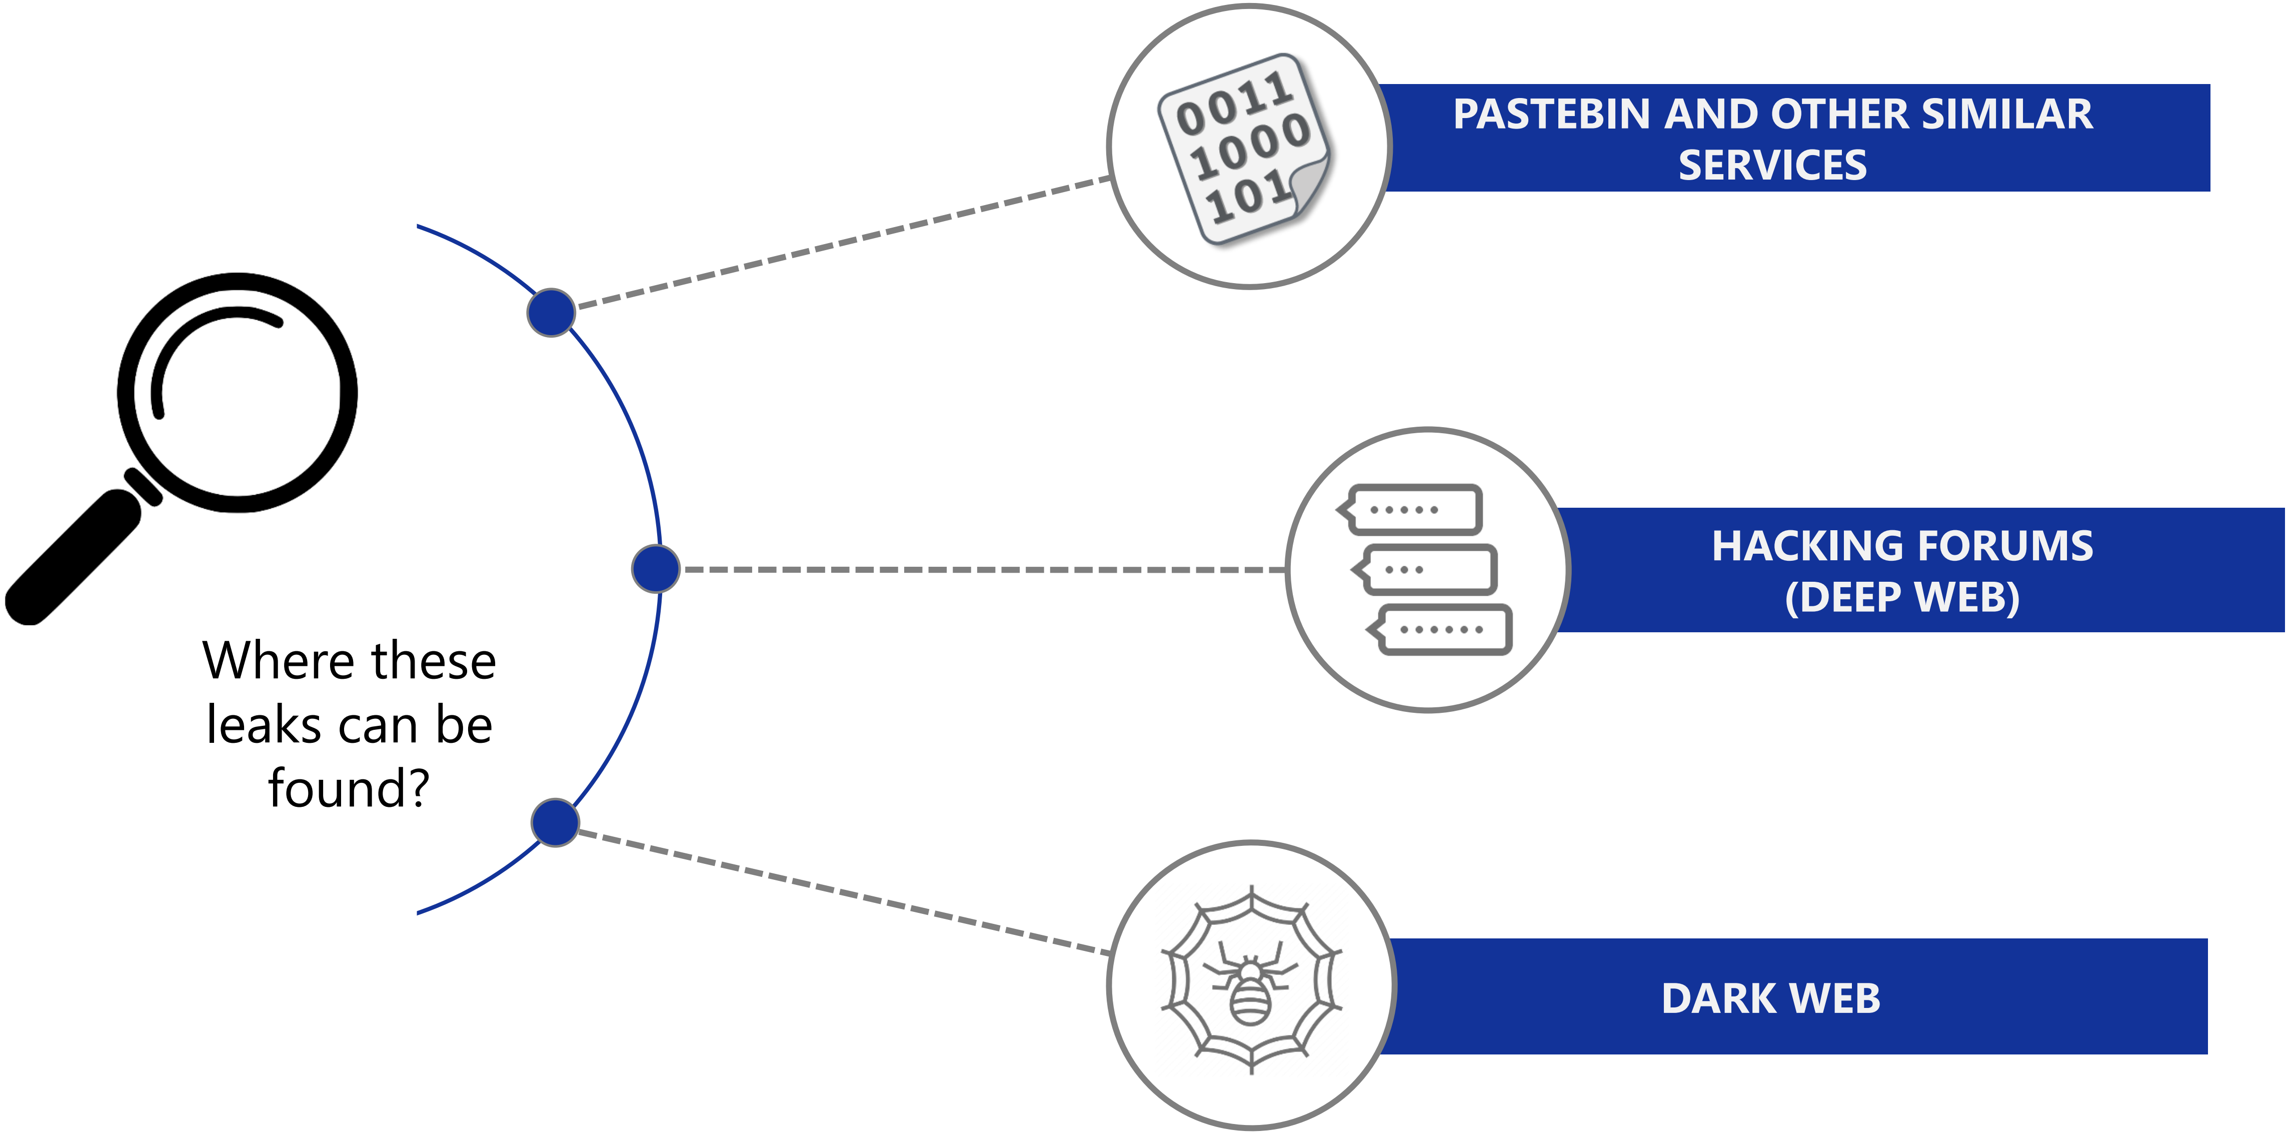
SEP 2019

An insecure webserver allowed completely unsecured access to private info of **four million Israelis (Israel population aprox. 9m)**. The list was including personal information, such as phone and ID numbers and the individual's stance vis-à-vis Likud: for, against or undecided…

The instructions included a video explaining how to utilize an online application that Likud developed, through which its representatives could update the details of every voter who arrived to cast a ballot.

HOW CAN SOMEONE OBTAIN ACCESS TO THESE LEAKS

WHERE CAN SOMEONE ACCESS THESE LEAKS?



Where these leaks can be found?

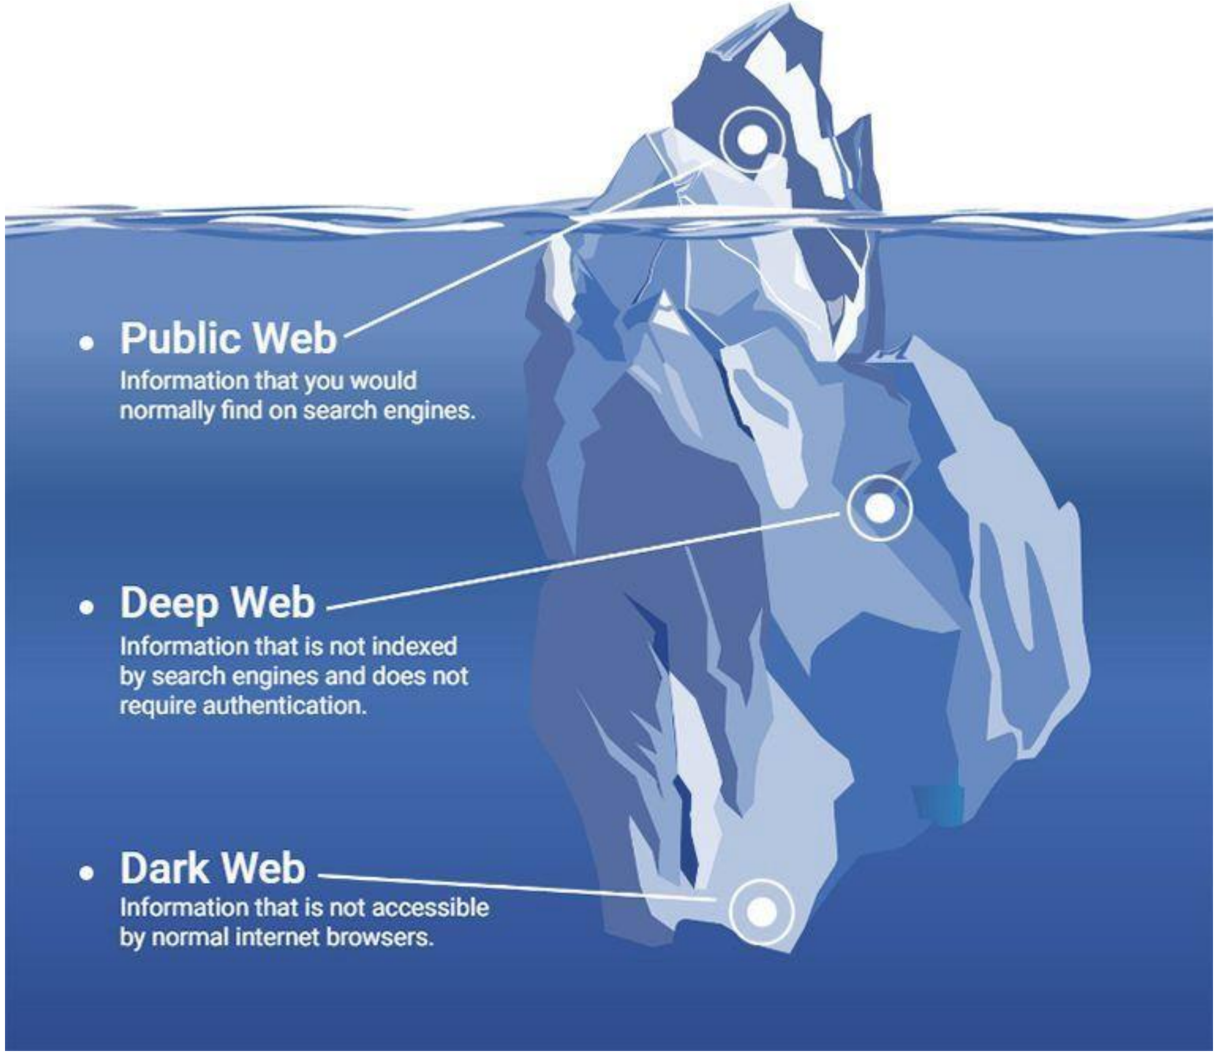
PASTEBIN AND OTHER SIMILAR SERVICES

HACKING FORUMS (DEEP WEB)

DARK WEB

HOW CAN SOMEONE OBTAIN ACCESS TO THESE LEAKS

PUBLIC, DEEP AND DARK? SIZE PLEASE?



- **Public Web**
  Information that you would normally find on search engines.
- **Deep Web**
  Information that is not indexed by search engines and does not require authentication.
- **Dark Web**
  Information that is not accessible by normal internet browsers.

± 6 %

PUBLIC WEB
Accessible from search engines
+- 19 Terabytes of information

± 93 %

DEEP WEB
Not publicly accessible content
+- 7500 Terabytes of information

± ? %

DARK WEB
Not indexed, actually unknown
(10k-100k active websites)

RECENT PASSWORD BREACHES

DARK INTERNET JOURNEY

WHAT IS INCLUDED AND WHO IS USING IT?

BLACK MARKETS
Drugs, Weapons, Data Leaks, stolen goods

TERRORISM
Used for organizing terrorism activities

PORNOGRAPHY
Distribution of illegal pornographic content

MONEY & CARDS
Counterfeit, card scamming and laundering services

HOAXERS
Many hoax sites looking for victims

HACKERS
Hacking Services can be purchased

BOTNETS
Hiring Bots and DDoS services

HITMEN
Hitmen for hire, arms dealers, etc

ACTIVISTS
Journalists, activists, whistle-blowers

DARK INTERNET JOURNEY
